UNIVERSITY IN REGION

As a result of effective and fruitful cooperation between the University and regional economy partners, graduates equipped with theoretical knowledge along with practical skills and social competences enter the labour market every year. Agreements which the State University of Applied Sciences in Leszno has concluded with employers enable its lecturers and experienced practitioners to conduct classes both in modern laboratories and workplaces in our region.

Cultural, educational and social events organised by our University both for the academic community and the whole region form an important aspect of our activity.
